Our Services & Capabilities

The Yazi team has designed, developed and delivered many different types of projects. We have a great deal of experience in the Education, Automotive, and Fintech sectors but love exploring new fields to land our acquired expertise while we learn new boundaries.

We can handle the whole process for you, from user requirements capture, design (both visual and technical), to implementation, testing, roll out and maintenance.

Consult, Analyze and Design

Our consultants have worked in many different types of projects, from greenfield to complex enterprise wide upgrades. We pride ourselves on mixing the right balance of soft skills with rigour of technical analysis.

- Business Process Analysis
- Business Process Optimisation
- Software Requirements Specification (SRS)
- Technical Documentation
- UX Design
- UX Research

Accelerate your startup

Having launched a number of products ourselves, we've gone through the cycle and know what to expect. If you're thinking about launching a new product and need some help navigating the myriad of technical challenges, we can help.

Let's start working together
